ROHAN | RFP

Drive Growth and Revenue:
AI-Powered RFP Automation and Knowledge Management

RohanRFP is a suite of purpose-built applications designed to simplify complex proposal response and knowledge management for both Government Contracting and Commercial sectors. The suite is built on a patented Organization-Specific Generative AI Platform, exclusively trained on a corpus of proposal-specific documents. With RohanRFP, proposal teams can quickly and efficiently deliver high-quality RFP responses that reflect your company's writing style, terminology, and format to ensure the proposals are complete, compliant and compelling.

Drive Growth, Eliminate Costs and Increase Revenue Simultaneously with RohanRFP.

APPLICATION CAPABILITIES

Answer Engine Quickly access answers to your company-related queries, along with source documents cited for verification. It's like having a subject matter expert at your fingertips, delivering precise and current information.

Solutions Architect Get support for enhanced brainstorming and proposal development with Solutions Architect, a tool to drive creativity and help create bespoke solutions to meet specific proposal requirements.

Proposal Writer The GenAI-powered Proposal Writer, allows you to easily create a new proposal or modify an existing one by intelligently referencing your summary and requirements against your company's comprehensive set of artifacts.

Graphics Lookbook Streamline RFP responses with our Graphics Lookbook, providing fast access to relevant graphics without the hassle of searching through large libraries or numerous documents for efficient proposal creation.

KEY OUTCOMES

ROHIRRIM

HOW IT WORKS

Rohan's unparalleled utility comes from its ability to ingest your company's unstructured data: proposals, engineering notes, white papers, solutions documents, emails, graphics, multimedia, and more. What makes Rohan different:

INGEST	ORGANIZE	GENERATE
Finished Proposals & Past Performance Docs	**ROHAN	RFP**	Answer Engine
White Papers, RFI Responses		Solutions Architect
Marketing Materials		Proposal Writer
Engineering / Project Summaries	Organization–Specific Generative AI Platform	Graphics Lookbook
Resume Database		
Pricing / LSAT Summaries		
Your proprietary information will never be used to train other AI models	Answers that are vectorized directly back to your source materials.	Generate effective response drafts using your content in minutes.

DIFFERENTIATORS

Patented Generative AI Technology (US #11748577 B1)

Intuitive and Purpose–Built UI/UX Workflows

Flexible Rohirrim or Customer Managed Deployment Model

Secure by Design Secure in Implementation

ABOUT ROHIRRIM

Our mission is to transform the capture and proposal management sector by helping customers leverage our industry–leading GenAI platform to streamline proposal creation; resulting in more wins with less overhead.
